

**A  
Project Report  
On  
"House-Marketplace"**

**Prepared by  
Naitik Patel (20DCS083)**

**Under the guidance of  
Prof. Brijesh Panchal**

**A Report Submitted to  
Charotar University of Science and Technology  
For Partial Fulfillment of the Requirements for the  
5<sup>th</sup> Semester Summer Internship-I (CS343)**

**Submitted at**

**Department of Computer Science & Engineering  
Devang Patel Institute of Advance Technology and Research  
At: Changa, Dist: Anand – 388421  
July 2022**

**CHARUSAT**  
CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

## CERTIFICATE

This is to certify that the report entitled “**House-Marketplace**” is a bonafide work carried out by **Mr. Naitik Patel (20DCS083)** under the guidance and supervision of **Asst. Prof Brijesh Panchal** for the subject **CS343 Summer Internship-I** of 5<sup>th</sup> Semester of Bachelor of Technology in **Department of Computer Science & Engineering, DEPSTAR** at Faculty of Technology & Engineering – CHARUSAT, Gujarat.

To the best of my knowledge and belief, this work embodies the work of candidate himself, has duly been completed, and fulfills the requirement of the ordinance relating to the B.Tech. Degree of the University and is up to the standard in respect of content, presentation and language for being referred to the examiner.

Brijesh Panchal  
Assistant Professor  
Department of Computer Science & Engineering

# Internship Completion Certificate

# **DECLARATION OF ORIGINALITY**

I hereby declare that the project report entitled “House-Marketplace” submitted by me to Devang Patel Institute of Advance Technology and Research, Changa in partial fulfillment of the requirement for the award of the degree of B.Tech in Computer Science & Engineering, DEPSTAR/FTE is a record of bonafide e CS343 Summer Internship-I (project work) carried out by me under the guidance Asst. Prof Brijesh Panchal. I further declare that the work carried out and documented in this project report has not been submitted anywhere else either in part or in full and it is the original work, for the award of any other degree or diploma in this institute or any other institute or university.

Naitik Patel (20DCS083)

Brijesh Panchal

Assistant Professor

DEPSTAR,CHARUSAT-CHANGA

# ACKNOWLEDGEMENT

We would like to express our special thanks of gratitude to our guide **Asst. Prof. Brijesh Panchal** allowed me to do this wonderful project on the topic '**House-Marketplace**', and made themselves available for all the queries, questions, and suggestions from their busy schedule.

Secondly for the success of my project, I would like to acknowledge the world of the Internet is YouTube, W3 schools and , websites which it very easy for me to learn web development.

Thank you,

NAITIK PATEL  
(20DCS083)

# ABSTRACT

Everyone has experienced in their life at least one time that when they want to purchase or sell a house also for rent they took a broker for that but broker charges a 1-2 % amount from that which is too expensive for us. So I have decided to make a website on which users can post their house for rent or sell or also can purchase or take for rent without paying any amount. Users can sign in and explore all houses as well as contact the landlord if interested in the deal. I have hosted a website on vercel which you can check out here <https://house-market-place-ecru.vercel.app/>

# CHAPTER 1

## PROJECT DEFINITION

### **1.1 Project Overview:**

A Responsive Web Application on which users can sell, purchase And also give their house for rent and take as well.

### **1.2 Objective :**

My objective is to make a platform only for the people who want to sell or purchase the properties. It is a user-friendly platform so that everyone can post their house and also refer other houses so that they can purchase.

### **1.3 Scope :**

As mentioned above it is user-friendly so that is helpful to the people they can have one-one conversations and create a deal without paying any amount to a third-party broker.

# CHAPTER 2

## DESCRIPTION

## **Project Planning :**

- User will Sign in / Sign up first.
- Then select categories according to their requirements. (Sell/Rent)
- Users can go to create a listing page to sell/rent their own house.
- Also users can put the offers.
- Interested can contact Landlord directly using a message box.
- After the deal user can delete or update the post.
- I will host this on vercel.com.

# CHAPTER 3

## SOFTWARE AND HARDWARE REQUIREMENTS

- **Software Requirements**

- Browser for Ex. Chrome, Brave, FireFox, etc.

- **Hardware Requirements**

- Laptop, Computer, Phone
- 2 GB RAM

- **Tools and Technologies :**

- **HTML-CSS**

HTML is used for structure and CSS is used for styling.

- **JavaScript**

JavaScript is the logic of every program.

- **React JS**

ReactJS is a library of JavaScript. React makes it painless to create interactive UIs.

- **Firebase**

Firebase is the simplest backend it contains many functionalities like Authentication, database, Hosting, etc.

- **Bootstrap & Material UI**

It is a CSS Library used to build beautiful UI.

- **ES Lint**

ES Lint is used to find an error and fixing in the Code editor.

- **Prettier**

It is used for the formatting of code.

- **Git/GitHub**

GitHub is open-source on which everyone can post their development skills.

- **Framer-Motion**

It is used to add Animation to Components like cards, images, etc.

- **Vercel**

Vercel is used for hosting the website.

# CHAPTER 4

## MAJOR FUNCTIONALITY

#### **4.1 Functionalities:**

A Responsive Web Application on which users can sell, purchase And also give their house for rent and take as well.

- User can put max 10 images.
- Attractive UI with animation.
- Contact Landlord section.
- Post house for Rent and Sell.
- Authentication with Google Or Email Password.
- User's Profile section.
- Users can update and delete their house after completed theirs.
- Different sections for a special offer on selling and rent houses.
- User can recover Forgot password.

# CHAPTER 6

## SCREENSHOT OF PROJECT

This is the first page of my project. Users will signin before moving to the main page or users can Signup first and then move further.

The image displays two wireframe designs for a web application, specifically the Sign Up and Sign In pages. Both pages share a common dark blue header with the 'House Marketplace' logo and navigation links (EXPLORE, OFFERS, PROFILE). The Sign Up page features a light purple card with a user icon, the title 'Sign Up', and input fields for Name, Email, and Password. It includes a 'Sign up' button, a 'Sign in with Google' option, and a link for 'Already User Login'. The Sign In page features a similar light purple card with a user icon, the title 'Sign In', and input fields for Email and Password. It includes a 'Forgot Password' link, a 'Sign in' button, a 'Sign in with Google' option, and a link for 'New User Sign up'. Both pages have a dark blue footer crediting 'Made By Harshil & Naitik'.

Fig 5.1 Login & Signup Page

This is the Home page here first you can see the slider which shows newest posted 5 houses for sell or rent by clicking on them you can visit see more details. Also in category user can select by their requirement.

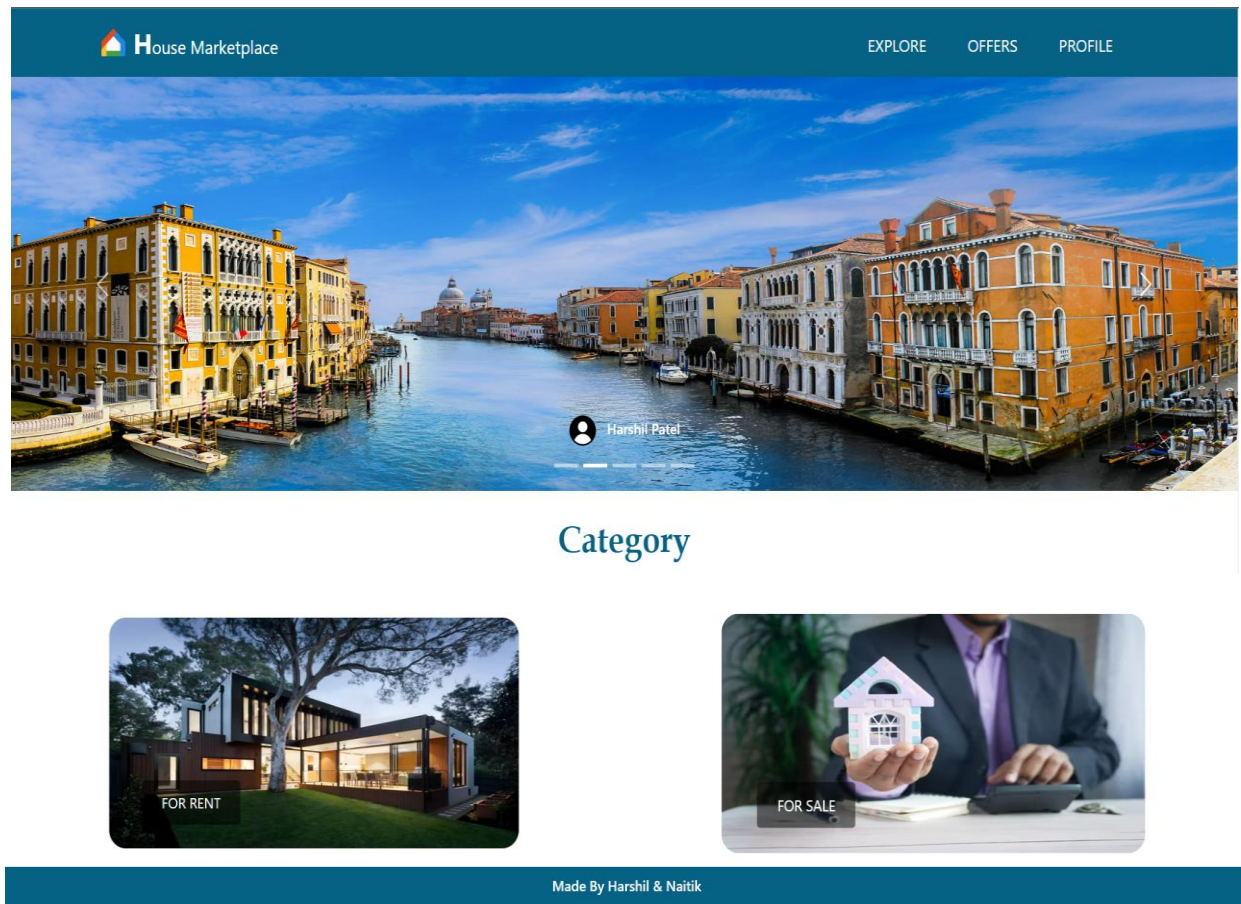

Fig 5.2 Home Page

Here user can see the houses for rent, by clicking on load more button more houses will be load from database.

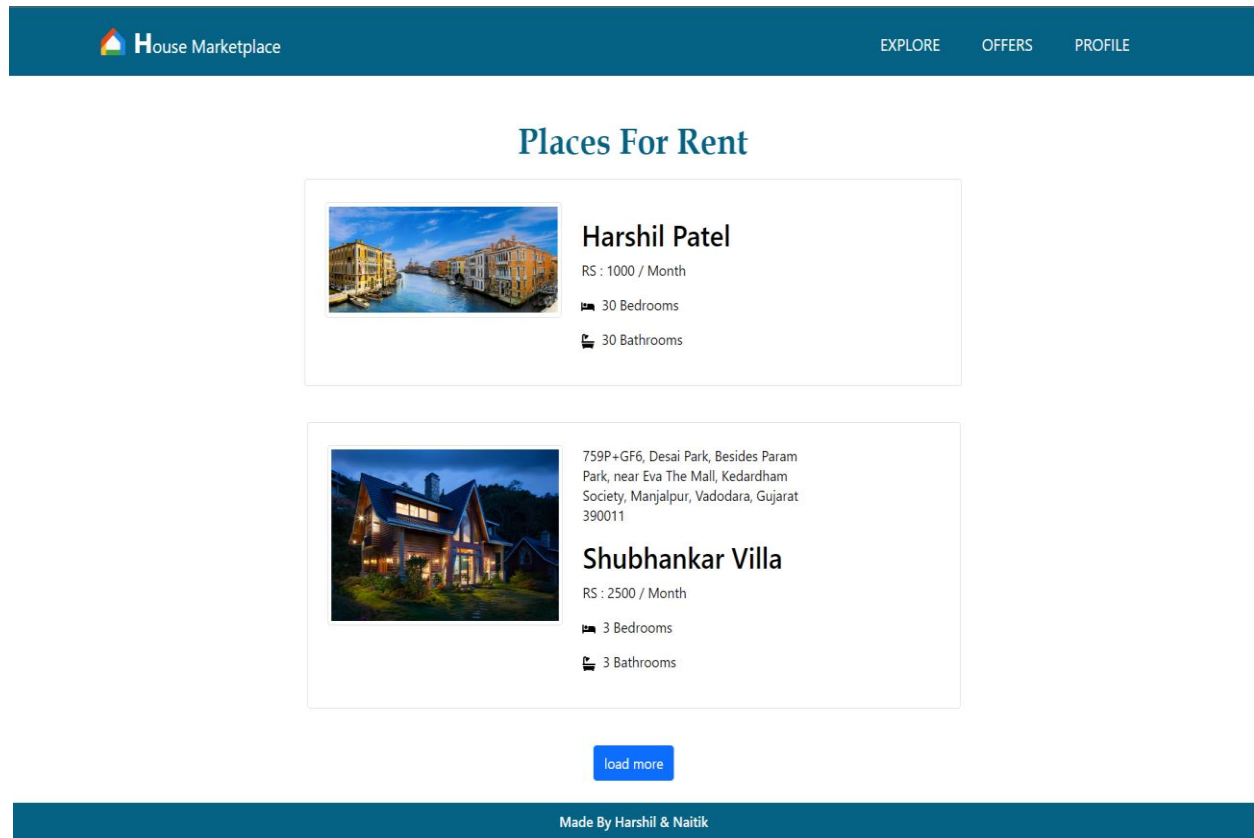

Fig 5.3 Rent Page

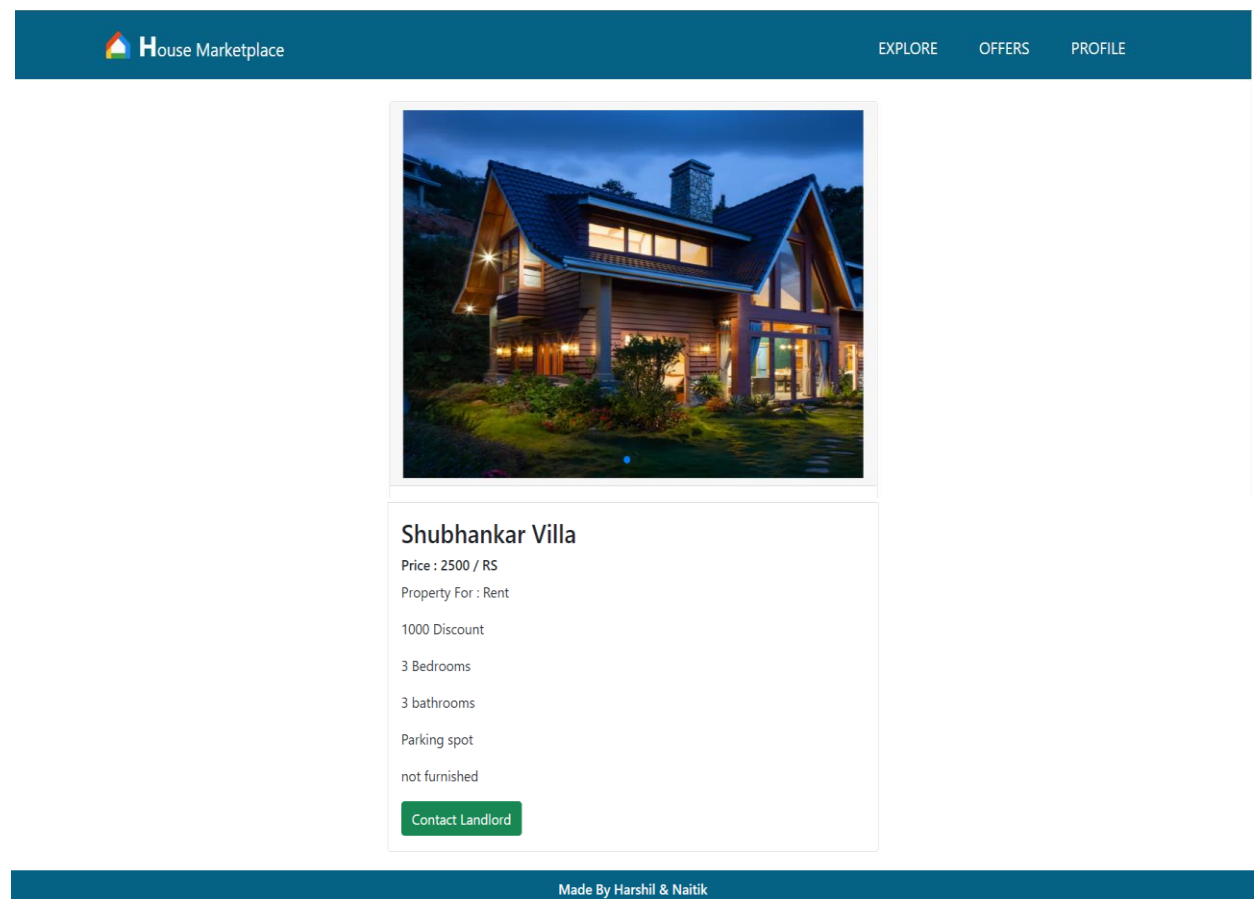

Fig 5.4 House Detail Page

Here User can see Profile Details and Houses that listed by user.

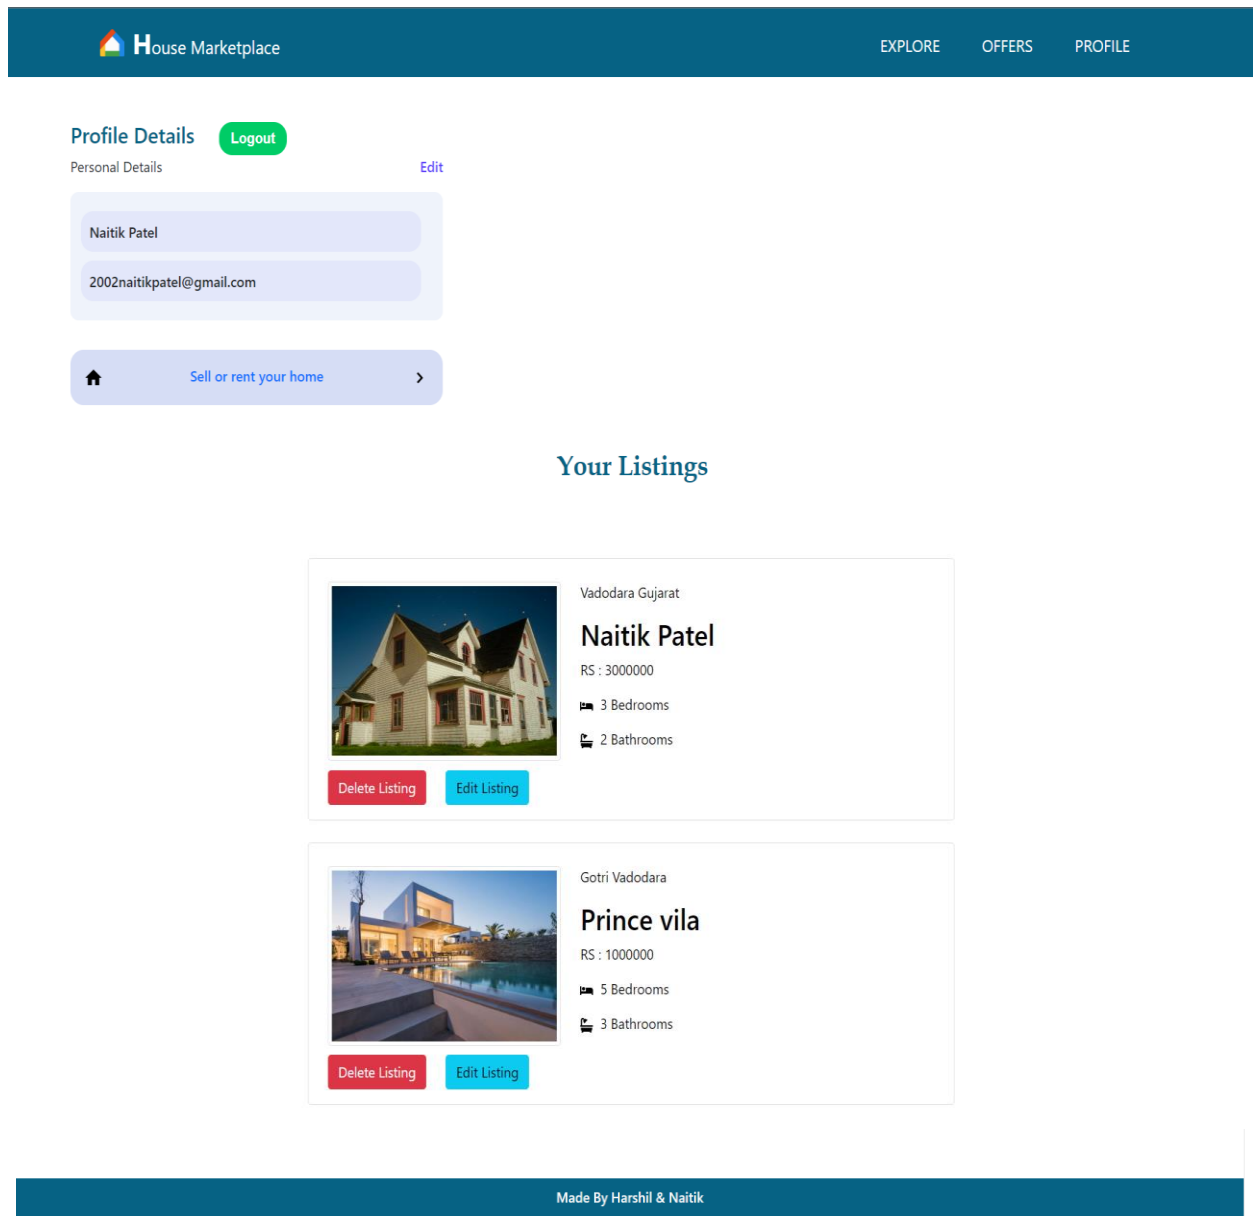

Fig 5.5 Profile Page

Interested can contact to the Landlord via sending message here.

# CHAPTER 7

## LIMITATIONS OF PROJECT

**Limitations/ Improvements we could make:**

- Some high quality images may not upload.
- In Offer page sell and rent both type of houses are mixed.
- User can not sort houses by their area.

# CHAPTER 8

## PROJECT OUTCOMES

## **Project Outcomes:**

I introduced to the world of web development, I started with fundamentals like HTML, CSS and JavaScript. Then I build up to ReactJs and it's libraries. I learned GitHub and posted my project on it. Also I used Firebase in my project so I got knowledge how to fetch & Upload data from a Database and Used Authentication. In the end, I learned how to use framer-motion(Animation) in Project, Also I hosted my website on Vercel which you can check out from this link <https://house-market-place-ecru.vercel.app/>

# CHAPTER 9

## FUTURE ENHANCEMENTS

**Future Enhancements:**

- Try to Add Sorting functionality.
- Will add Google map location for individual house.
- Try to add a advertise for financial purpose.
